Introducing the 6SAVA Technology Uptake Platform

– your pathway to open innovation

The platform is part of the 6SAVA Project, a Horizon Europe coordination and support action focused on boosting innovation capacity in Croatia, Serbia, and Bosnia and Herzegovina. Backed by a consortium with deep regional insight and experience in open innovation, the platform is built to match your needs.

*Envisioned as a regional marketplace for innovation, the platform brings together three key elements: **technology providers, commercialization actors, and funding opportunities.***

Our region holds immense innovation potential, and our mission is help you realize it.

– 6SAVA coordination team

For technology providers

Whether you're an SME, start-up, or research group, the platform offers a space to showcase your technological assets, services, or unique research infrastructure.

You gain a direct channel to partners, funding instruments, and consortium opportunities for international research and innovation.

For companies seeking solutions

This is your one-step shop! Browse technology profiles or publish your challenge. We'll help you find the ideal partner.

For public bodies, business facilitators and civil society organisations

Are you striving to address regional challenges through technological advancements? Join the platform and engage with a dynamic community of innovators. Strengthen your support services, expand the visibility of your stakeholders, and connect with international partners to amplify the impact of public innovation initiatives.

Start your innovation journey at
